WHAT IT SOLVES

More contrast, fewer reflections, more immersion

3000:1 contrast
Twice what an equivalent IPS panel gives: in a dark scene, black looks black and not gray.

1500R curvature
One of the tightest curves on the market: the edges sit the same distance from the eye as the center does.

144 Hz with 1 ms
Scrolling through documents and the movement of the cursor look continuous, not steppy like at 60 Hz.

Joystick control
A five-way navigation button replaces the five buttons: the menu gets adjusted in seconds.

VA against IPS: there is no best panel, only the right one for each case. **IPS** keeps color even from any angle and runs brighter, so it works in a lit office and for shared work. **VA** doubles the contrast —3000:1 against 1500:1— and delivers deep blacks: better for video, gaming and dim rooms.

WHERE IT FITS

Made for the home desk and long hours on screen

VIDEO AND GAMING

The image wraps around you

1500R curvature with 3000:1 contrast: dark scenes keep their detail and the screen covers more of your field of view.

- 1500R curvature
- 3000:1 contrast
- 144 Hz · 1 ms MPRT

LONG SESSIONS

Anti-glare surface

The anti-glare coating scatters light from a window or a lamp instead of sending it back at you: less strain in long sessions.

- Anti-glare surface
- 99 % sRGB · 178°
- 3 color temperatures

CONNECTION AND MOUNTING

DisplayPort 1.4 and VESA 75

DP 1.4 beats the 1.2 of the flat models, and the VESA mount lets you put it on an arm or a wall at just 3 kilos.

- HDMI 2.1 and DP 1.4
- VESA 75 and Kensington
- 3.00 kg net weight
