WHAT IT SOLVES

Smooth image and rested eyes in long sessions

4000:1 contrast
Almost three times an equivalent IPS panel: in a dark scene, black looks black and not gray.

27 curved inches
1500R curvature on a big screen: where it shows most, because the edges sit far away on a flat monitor.

144 Hz with 1 ms
Scrolling through documents and the movement of the cursor look continuous, not steppy like at 60 Hz.

350 nits and anti-glare
Brighter than the 23.6" model and anti-glare treated: it also works in rooms with plenty of light.

Part number
MON27CADV2752S

The curve at 27 inches: the curve is there so that every point of the screen sits at a similar distance from the eye. On a small monitor the gap between the center and the edges is smaller, so it barely shows; **at 27 inches it does**. That is why the 1500R curve pays off more at this size than at 24.

WHERE IT FITS

Made for gaming, video and the big desk

VIDEO AND GAMING

The image wraps around you

1500R curvature with 3000:1 4000:1 on 27 inches: dark scenes keep their detail and the screen fills your field of view.

- 1500R curvature
- 4000:1 contrast
- 144 Hz · 1 ms MPRT

LONG SESSIONS

Anti-glare surface

The anti-glare coating scatters the light of a window or a lamp instead of sending it back at you: less strain in long sessions.

- Anti-glare surface
- 99 % sRGB · 178°
- 3 color temperatures

CONNECTION AND MOUNTING

DisplayPort 1.4 and VESA 75

DP 1.4 beats the 1.2 of the flat models, and the VESA mount lets you put it on an arm or a wall at 5.2 kilos of weight.

- HDMI 2.1 and DP 1.4
- VESA 75 and Kensington
- 5.20 kg net weight
