WHAT IT SOLVES

A comfortable screen for the whole day

144 Hz with 1 ms
Scrolling through documents and the movement of the cursor look continuous, not steppy like at 60 Hz.

99 % sRGB
Almost full coverage of the standard color space: colors look the way they should, not washed out.

Built-in speakers
Built-in audio for video calls and alerts: one less accessory to add to the workstation.

Borderless design
Very thin frames on three sides: two side by side look almost like a single continuous screen.

144 Hz beyond gaming: a high refresh rate is not only for gaming. An ordinary office monitor runs at 60 Hz, and there the cursor and the scrolling of a spreadsheet look steppy. At 144 Hz the movement is continuous: the text stays readable as the page goes down and the eyes tire less over an eight-hour day.

WHERE IT FITS
