PORTABLE THERMAL PRINTER · 58 MM PAPER

ADV-7011N

Direct thermal at 90 mm/s · Bluetooth and USB · battery · 200 grams

TWO HUNDRED GRAMS, BATTERY INCLUDED
It prints the receipt where the sale closes

A portable thermal printer weighing **200 grams with a rechargeable battery**: it prints 58 mm receipts at 90 mm per second, over **Bluetooth or USB**. It uses the standard **ESC/POS** language and works with Windows, Linux, Android and iOS. It prints QR codes and needs no ink or toner.

THE POINT OF SALE FITS IN A POCKET

REFERENCE IMAGE

PAPER	SPEED	BATTERY	WEIGHT
58 mm	90 mm/s	2000 mAh	200 g

WHAT IT SOLVES

Everything a sale away from the counter needs

200 grams with battery
It fits in a jacket pocket and runs without a socket: the printer goes where the customer is.

ESC/POS language
The industry standard for receipts: it works with most point-of-sale systems with no custom development.

It prints QR codes
It puts QR codes on the receipt, which is what electronic invoicing and digital payments ask for today.

90 millimeters per second
A ten-centimeter receipt comes out in little over a second: the queue does not stop for the printer.

ADVANCE

Part number
PRADV7011N

What 50 km of printhead means: printhead life is measured in kilometers of printed paper, and here it is 50. In practice: an average ten-centimeter receipt gives around 500,000 tickets before the printhead reaches its limit. For a business issuing a hundred receipts a day, that is over thirteen years of use.

WHERE IT FITS

Made for delivery, the market stall and sales on the road

DELIVERY AND ROAD SALES

The receipt comes out on the spot

A 2000 mAh battery and Bluetooth to the phone: the courier or the sales rep hands over a printed receipt without going back to the store.

- Rechargeable battery
- Bluetooth and USB
- 11.40 × 8.00 × 5.00 cm

COMPATIBILITY

It works with what the business already uses

Windows, Linux, Android and iOS, with the ESC/POS language: it plugs into billing systems and sales apps with no special development.

- Windows, Linux, Android and iOS
- ESC/POS language
- QR codes

NO CONSUMABLES

Just the paper roll

Direct thermal printing uses no ink, ribbon or toner: the only consumable is the 58 mm thermal roll, cheap and easy to find.

- No ink or toner
- 58 mm roll · up to 40 mm
- Paper end sensor

DATASHEET · THERMAL PRINTER

Printing, paper, connectivity and battery

PRINTING

Technology	Direct thermal · no ink or toner
