WHAT IT SOLVES

Four cores from 2.60 to 3.50 GHz with integrated Radeon graphics, 8 GB of RAM and a 256 GB M.2 SSD.

TPM 2.0 for Windows 11
The security chip Windows 11 requires, and the one that enables hardware disk encryption.

A 15.6-inch screen in a body under two centimeters thick and a little over a kilo and a half.

Ships with no operating system: the notebook ships with **FreeDOS**, not Windows: the license has to be added to the quote or a free Linux distribution installed. What it does bring is the **TPM 2.0 chip**, which is exactly what Windows 11 requires to install, so the machine is ready to take it with no limitations.
