WHAT IT SOLVES

Up-to-date system, big screen and a case included

Android 16
It ships with the newest version of the system: more years of app compatibility.

Dual-band WiFi
It connects on 2.4 and 5 GHz with 802.11ac: the 5 GHz band is faster and has less interference.

Flip cover included
It comes in the box: it protects the screen in transit and props it up for watching.

5000 mAh battery
The same capacity as the higher tablets in the line, charging over USB Type-C.

ADVANCE

TBADVSP3702B

The 5 GHz band: this is a WiFi tablet, so the quality of the connection depends entirely on the router. That is why it matters that it supports 5 GHz as well as 2.4: fewer devices compete on that band —microwaves, phones, neighboring routers— and video plays without stutter. Tell the customer to use the 5 GHz network.
